

1 Appeal from the United States Bankruptcy Court
2 for the Eastern District of California

3 Honorable Robert S. Bardwil, Bankruptcy Judge, Presiding.²
4

5 Before: PAPPAS, BUFFORD³ and MONTALI, Bankruptcy Judges.

6 These four related appeals arise from the chapter 12
7 bankruptcy⁴ case of William A. Toso ("Debtor"). EC-05-1290 is
8 Debtor's appeal from the bankruptcy court's decision denying
9 confirmation of his proposed chapter 12 plan. EC-05-1389 is a
10 cross-appeal by secured creditor Bank of Stockton ("Bank")
11 challenging the same order to the extent it also overruled several
12 of Bank's objections to confirmation.

13 In EC-06-1148 and EC-06-1149, Bank appeals both the order
14 entered February 8, 2006, by the bankruptcy court determining that
15 its security interest would not attach to Debtor's post-bankruptcy
16 asparagus crops, and the bankruptcy court's amended order entered
17 on March 31, 2006, concerning the same motion. These two appeals
18 were consolidated for consideration by the Panel.
19

20
21 ² The bankruptcy case in which these appeals arose was
22 reassigned from the Honorable Thomas C. Holman to the Honorable
23 Robert S. Bardwil on July 6, 2005. The decisions of the
24 bankruptcy court reviewed in EC-05-1290 and EC-05-1389 were made
25 by Judge Holman. Judge Bardwil rendered the decisions examined in
26 EC-06-1148 and 1149.

27 ³ Hon. Samuel L. Bufford, United States Bankruptcy Judge for
28 the Central District of California, sitting by designation.

⁴ Unless otherwise indicated, all chapter, section and rule
references are to the Bankruptcy Code, 11 U.S.C. § 101-1330 and to
the Federal Rules of Bankruptcy Procedure, Rules 1001-9036, as in
force prior to the effective date (October 17, 2005) of the
Bankruptcy Abuse Prevention and Consumer Protection Act of 2005,
Pub. L. 109-8, Apr. 20, 2005, 119 Stat. 23.

1 The four appeals were argued and submitted to the Panel at
2 the same time; this decision disposes of the issues raised in all
3 of them. For the reasons stated below, we AFFIRM in part and
4 DISMISS in part.

5 **FACTS**⁵

6 Debtor's family has been farming in the San Joaquin valley of
7 California for over 40 years. From January 1, 1976, to July 1,
8 2002, the family operated a farm under the name Arnold Toso &
9 Sons, a partnership. The partnership was composed of Debtor, his
10 parents Arnold C. and Georgette Toso,⁶ and his brother Arnold L.
11 Toso. The partnership obtained agricultural business loans from
12 Bank.

13 In July, 2002, the partnership ceased doing business and the
14 Toso family members undertook three independent farming
15

16

⁵ There is substantial agreement between Debtor and Bank
17 regarding the facts relevant to these appeals. At the time of
18 plan confirmation, neither the Debtor, Bank nor the chapter 12
19 trustee submitted separate statements of disputed material fact,
20 as authorized by Eastern District of California Bankruptcy Local
Rule 9014-1(f)(1)(ii) and (iii). And Bank explicitly acknowledges
the accuracy of most portions of Debtor's Statement of the Case.

⁶ Debtor's parents also filed for relief under chapter 12
21 ("Parents Case"). Their litigation with Bank in that case
22 generated an appeal and cross-appeal to this Panel, EC-05-1291 and
1388. Prior to decision, though, the parties settled their
23 differences and stipulated to dismiss those appeals, which
occurred on August 1, 2006.

24 Bank requested on December 20, 2005, that we take judicial
25 notice in deciding these appeals of the transcript of a May 3,
2005, hearing in Parents Case. While these documents may contain
26 information that is not "adjudicative fact" as specified in FED.
R. EVID. 201, Debtor did not object to this request. Bank's
27 request is therefore GRANTED to the extent that the Panel will
consider the arguments of the parties and the findings of the
28 bankruptcy court as reflected in the record of this hearing.
Citations to this transcript are designated herein as: Tr. Hr'g
(Parents Case) <page and line> (May 3, 2005).

1 operations. The partnership assets were divided. Debtor was
2 allocated the asparagus fields, which had been planted by the
3 partnership, as well as packing sheds and certain equipment.⁷

4 At about the same time, with Bank's consent, the debt that
5 the partnership owed to Bank was converted to separate loans to
6 the three former partners, including Debtor. The new loans were
7 not cross-collateralized.⁸

8 Sometime in 2004, Debtor's loans matured. Bank allegedly
9 refused to extend the maturity date of the loan, or to extend any
10 new credit to Debtor, in part because Debtor supplied no new
11 operating budget proposal to Bank.

12 Debtor filed a petition for relief under chapter 11 of the
13 Bankruptcy Code on August 6, 2004. On December 3, 2004, Bank
14 filed two proofs of claim in Debtor's chapter 11 case. Proof of
15 Claim no. 6 was for \$160,617.44, with \$147,206.72 listed as
16 unsecured debt and \$13,410.72 as secured debt. The security for
17 this loan was Debtor's "crops, general intangibles and farm
18 equipment." Proof of Claim no. 8 was for \$290,614.08, with
19 \$154,614.08 listed as unsecured debt and \$136,000 as secured by a
20 security interest in "farm packaging and processing equipment."
21 The security agreements also provided that the Bank's security
22 interest covered Debtor's after-acquired property of the same
23 variety.

24
25 ⁷ Debtor also conducted a small walnut dehydrating and bell
pepper packing operation.

26 ⁸ The record does not reveal the exact amount of debt
27 assumed by Debtor at the time the family partnership was
dissolved. Bank alleges that Debtor remained obligated as a
28 general partner of the partnership for repayment of any
partnership debt not retired by the new loans.

1 The chapter 11 case was converted to a case under Chapter 12
2 on January 4, 2005, and a trustee was appointed. On March 21,
3 2005, Debtor filed his proposed First Amended Chapter 12 Plan
4 ("the Plan").

5 On March 18, 2005, Debtor filed a Motion for Order
6 Determining Value of Security Held by Bank of Stockton, requesting
7 that the bankruptcy court determine the amount of Bank's allowed
8 secured claims. Bank did not oppose the motion. The bankruptcy
9 court granted the motion without oral argument and entered an
10 order on April 26, 2005 (the "Security Valuation Order"). In its
11 order, the court determined that the value of Bank's secured
12 interest in Debtor's leased asparagus beds on the petition date
13 was \$13,850, and that the value of Bank's secured interest in
14 Debtor's equipment on the petition date was \$46,400. The order
15 allowed these amounts as secured claims. The balance owing on
16 Bank's claims was allowed as a general unsecured claim. Bank did
17 not appeal the Security Valuation Order.

18 The bankruptcy court conducted an initial confirmation
19 hearing on the Plan on May 3, 2005. Bank made the only objection
20 to confirmation of the Plan. The court continued the hearing so
21 the parties could offer evidence regarding two questions: the
22 feasibility of the Plan for purposes of § 1225(a)(6); and the
23 adequacy, under § 1225(a)(5)(B), of the six percent interest rate
24 Debtor proposed for Bank's secured claims.

25 The second plan confirmation hearing occurred on May 19,
26 2005. The bankruptcy court heard testimony from James Daniel
27 Miller ("Miller"), the Director of Field Operations for Jacobs,
28 Malcolm & Burk ("JMB"), an entity that had agreed to finance and

1 market Debtor's 2005 asparagus crop. Debtor also testified. At
2 the conclusion of testimony, the court requested additional
3 briefing on Bank's claimed security interest in the asparagus beds
4 and crops.

5 The bankruptcy court issued its Memorandum Decision and Order
6 on June 27, 2005. The court considered five separate objections
7 raised by Bank to confirmation of the Plan. It overruled four of
8 the objections, but sustained one. Its decision can be summarized
9 as follows:

10 1. Bank argued that Debtor was not committing all of his net
11 disposable income to fund the Plan. The bankruptcy court
12 overruled this objection based upon its finding that the Debtor
13 had indeed satisfied § 1225(b)(1)'s requirement that he devote all
14 of his projected (though not, as Bank demanded, his actual)
15 disposable income to payments under the Plan.

16 2. Bank argued that the Plan was unclear as to the rights
17 and remedies that were available to Bank in the event that Debtor
18 failed to perform his obligations to Bank under the Plan. The
19 court overruled this objection, noting that Bank failed to cite to
20 any statutory authority for the objection, and that the Plan
21 provided that Bank retain all rights existing under the loan
22 documentation unless modified by the Plan.

23 3. Bank argued that the Plan was not feasible for three
24 reasons. First, Bank contended Debtor failed to provide evidence
25 of adequate financing of its operation. The court overruled this
26 objection, observing that this was the purpose for the evidentiary
27 hearing, and that Debtor had provided sufficient evidence that
28 external financing from JMB was available. Next, Bank argued that

1 the Plan projected a need for "bank debt," but did not provide for
2 payment of interest on bank debt. The court overruled this
3 objection by accepting Debtor's explanation that the term "bank
4 debt" was a misnomer, and that, instead, Debtor would be financed
5 by external, unsecured financing, which was available. Third,
6 Bank argued that Debtor's income projections were unrealistically
7 high, based on the fact that Debtor admitted at the hearing that
8 he expected to harvest 5,000 cartons of asparagus less than he
9 projected in the Plan budget. The court overruled the objection
10 on the grounds that any shortfall in production had been offset by
11 an increase in actual crop prices.

12 4. Bank argued that the Plan failed the best interests of
13 creditors' test because it did not apply excess revenue to
14 payments to unsecured creditors. The court overruled this
15 objection, noting that there was no excess revenue contemplated by
16 the Plan, only an offset of lower production costs by higher
17 prices.

18 5. Finally, Bank argued that the Plan failed to provide for
19 Bank's claimed security interest in the asparagus crop. The
20 bankruptcy court sustained this objection. The court determined
21 that, under the California Commercial Code and § 552(b)(1), Bank's
22 prepetition lien in Debtor's crops extended to Debtor's 2005 post-
23 bankruptcy asparagus crop. Since the Plan did not propose to pay
24 Bank anything on account of its secured interest in that crop (as
25 compared to payments for Bank's interest in the asparagus beds on
26 which the crops were grown), the Plan failed to satisfy the
27 requirements of § 1225(a)(5). However, the court noted its ruling
28 was without prejudice should Debtor thereafter ask the court to

1 limit the extent of Bank's security interest in the asparagus crop
2 if he could meet the "equities of the case" exception under
3 § 552(b)(1).⁹

4 Because Debtor could not show that the Plan satisfied the
5 requirements of § 1225(a)(5) with respect to Bank's secured claim
6 in crops, the bankruptcy court ordered that confirmation of the
7 Plan be denied. Debtor timely filed an appeal of this order on
8 July 7, 2005. Bank filed a timely cross-appeal on July 15, 2005.

9 While these appeals were pending, on November 16, 2005,
10 acting on the bankruptcy court's suggestion, Debtor filed a Motion
11 for Determination of Postpetition Effect of Security Interest. In
12 the motion, Debtor sought an order from the court under
13 § 552(b)(1), determining that Bank's security interest should not,
14 based upon the equities of the case, extend to its 2005 and 2006
15 asparagus crops.

16 A hearing concerning Debtor's motion was conducted on January
17 18, 2006. After considering the submissions and arguments of the
18 parties, the bankruptcy court granted the motion and entered its
19 findings on the record:

20 The Court finds that none of the bank's cash
21 collateral was used for production of the
22 2005 asparagus crop; and that the equities of
23 the case support the determination that the
24 bank's lien does not go on in perpetuity on
25 this asparagus crop.

26 Tr. Hr'g 17:25 - 18:4 (January 18, 2006). The court entered an
27 order granting Debtor's motion on February 7, 2006, and provided

28 ⁹ The court also indicated that Debtor might attempt to surcharge Bank's collateral under § 506(c) or to assert other rights. The record does not reflect that Debtor has done so.

1 that Debtor deposit sufficient funds to pay Bank's allowed secured
2 claim as to the asparagus beds (\$13,850 plus interest) in a
3 segregated bank account. Bank moved for reconsideration of this
4 order, and after a hearing, the bankruptcy court denied the motion
5 for reconsideration in a March 30, 2006, order.¹⁰ Bank filed
6 timely appeals of both the February 7 and March 30 orders on April
7 10, 2006.

8 9 **JURISDICTION**

10 The bankruptcy court had jurisdiction pursuant to 28 U.S.C.
11 §§ 1334 and 157(b)(2)(B), (K), and (L). We have jurisdiction over
12 these interlocutory appeals pursuant to 28 U.S.C. §§ 158(a)(3) and
13 (b).¹¹

14 15 **ISSUES**

16 **(Debtor's Appeal, EC-05-1290)**

17 1. Whether the bankruptcy court erred in determining under
18 § 552(b)(1) that Bank's pre-petition security interest in Debtor's
19 crops attached to Debtor's post-petition asparagus crop.

20 **(Bank's Cross-Appeal, EC-05-1389)**

21 2. Whether the bankruptcy court erred when it determined
22 that the interest rate for payments to be made on Bank's allowed
23 secured claim was adequate under § 1225(a)(5)(B)(ii).

24 _____
25 ¹⁰ The court slightly modified its February 7 order to
26 provide that the Bank's lien would attach to the money deposited
by Debtor to pay the secured claim. An Amended Order was entered
March 31, 2006.

27 ¹¹ The Panel granted leave to appeal the interlocutory orders
28 on September 12 (no. EC-05-1290) and October 18, 2005 (EC-05-
1389), and on May 31, 2006 (EC-06-1148 and EC-06-1149).

1 Fargo Bank Nw., N.A. v. Yett (In re Yett), 306 B.R. 287, 290 (9th
2 Cir. BAP 2004), citing Predovich v. Staffer (In re Staffer), 262
3 B.R. 80, 82 (9th Cir. BAP 2001), aff'd, 306 F.3d 967 (9th Cir.
4 2002).

5 Determining the factors to measure the adequacy of a plan
6 provision for a secured claim pursuant to § 1225(a)(5) involves an
7 interpretation of statute that we review de novo, while the
8 application of those factors to a particular case is a question of
9 fact reviewed for clear error, giving "substantial deference" to
10 the bankruptcy court in making cramdown interest rate
11 determinations. Farm Cred. Bank v. Fowler (In re Fowler), 903
12 F.2d 694, 696 (9th Cir. 1990), citing with approval, Patterson v.
13 Fed. Land Bank (In re Patterson), 86 B.R. 226, 227 (9th Cir. BAP
14 1988).

15 Whether a chapter 12 plan that proposes that all of a
16 debtor's projected disposable income will be applied to make
17 payments under the plan satisfies § 1225(b)(1)(B) is a question of
18 law for the Panel. Fobian v. W. Farm Cred. Bank (In re Fobian),
19 951 F.2d 1149, 1151 (9th Cir. 1991).

20 Whether a chapter 12 plan satisfies the feasibility test for
21 confirmation under § 1225(a)(6) is a factual determination which
22 we review for clear error. Miller v. Nauman (In re Nauman), 357
23 B.R. 355, 357 (9th Cir. BAP 1997).

24 Whether a creditor's security interest extends to property
25 acquired after bankruptcy under § 552(b)(1) is a question of law
26 we review de novo. However, the decision whether to apply the
27 equitable exception under § 552(b)(1) is reviewed for abuse of
28

1 discretion. J. Cattan Farms v. First Nat'l Bank of Chicago, 779
2 F.2d 1242, 1247 (7th Cir. 1985).

3 Whether the bankruptcy court's ruling violated the
4 Constitution is a matter of law for the Panel to decide. Buono v.
5 Norton, 371 F.3d 543, 548 (9th Cir. 2004). A bankruptcy court's
6 determination on mixed questions of law and fact that implicates
7 constitutional rights is reviewed de novo. Cogswell v. City of
8 Seattle, 347 F.3d 809, 813 (9th Cir. 2003).

9 10 **DISCUSSION**

11 **I. Debtor's Appeal, EC-05-1290**

12 The bankruptcy court did not err in determining that, under
13 § 552(b)(1), Bank's pre-petition security interest in Debtor's
14 crops extended to Debtor's post-petition asparagus crop.

15 The bankruptcy court decided at the May 19, 2005, hearing
16 that Bank's pre-bankruptcy security interest extended to the post-
17 petition crops grown on Debtor's existing asparagus beds.
18 Consistent with its oral decision, in its June 27, 2005,
19 Memorandum Decision, the bankruptcy court denied confirmation of
20 the Plan because, in violation of § 1225(a)(5), the Plan did not
21 provide for Bank's secured claim attributable to the post-
22 bankruptcy asparagus crop.

23 Debtor asks us to reverse the bankruptcy court's decision.
24 Debtor contends that any security interest held by Bank terminated
25 by operation of § 552(a) as to any crops grown after the filing of
26 his petition. Therefore, Debtor argues, the Plan need not
27 recognize a secured claim in Bank's favor as to any asparagus
28 crops he raised in 2004 and later years.

1 Section 552(a) provides, as a general rule, that "Except as
2 provided in subsection (b), property acquired by the estate or by
3 the debtor after the commencement of the case is not subject to
4 any lien resulting from any security agreement entered into by
5 debtor before commencement of the case." But, as the Supreme
6 Court has noted: "Section 552(b) [(1)] sets forth an exception,
7 allowing postpetition 'proceeds, product, offspring, rents, or
8 profits' of the collateral to be covered only if the security
9 agreement expressly provides for an interest in such property, and
10 the interest has been perfected under 'applicable nonbankruptcy
11 law.'" United Sav. Ass'n of Tex. v. Timbers of Inwood Forest
12 Assocs, Ltd., 484 U.S. 365, 374 (1988) (citations omitted).¹² The
13 question presented by Debtor's appeal is whether Bank's security
14 interest in his post-bankruptcy asparagus crops was extinguished
15 by § 552(a) when he filed his petition, or whether the effect of
16 that security interest was saved by the § 552(b) (1) exception.

17 Specifically, the bankruptcy court found that

18 . . . [A]sparagus grows in beds that produce
19 commercial crops over a period of ten to
20 twelve years. The asparagus beds on debtor's
real property are seven to eight years old;

21 ¹² Section 552(b) (1) provides:

22 [I]f the debtor and an entity entered into a security
23 agreement before the commencement of the case and if the
24 security interest created by such security agreement
25 extends to property of the debtor acquired before the
26 commencement of the case and to proceeds, product,
27 offspring or profits of such property, then such
28 security interest extends to such proceeds, product,
offspring, or profits acquired by the estate after the
commencement of the case to the extent provided by such
security agreement and by applicable nonbankruptcy law,
except to any extent that the court, after notice and a
hearing and based on the equities of the case, orders
otherwise.

1 thus, they were planted before August 6, 2004,
2 the date of the bankruptcy filing. The 2004
3 crop did not first appear until the Spring of
4 2005, well after the filing. Nevertheless,
5 the post-petition asparagus constitutes crops
6 as defined in the Agricultural Security
7 Agreement dated June 27, 2002 (the "Security
8 Agreement"). . . . In re Dettman, 84 B.R. 662
9 (9th Cir. BAP 1988); In re Beck, 61 B.R. 671
10 (Bankr. D.Neb. 1985). The bank's security
11 interest in crops includes rights in proceeds
12 of the crops. Cal. Comm. [sic] Code
13 §§ 9203(f) and 9315. . . . Under 11 U.S.C.
14 § 552(b)(1), the Bank's security interest
15 under the Security Agreement extends to all
16 collateral acquired by the debtor prior to the
17 bankruptcy filing and to all proceeds,
18 product, offspring, or profits acquired by the
19 estate after the commencement of the case
20 "except to the extent that the court, after
21 notice and a hearing and based on the equities
22 of the case, orders otherwise."

23 Contrary to the bankruptcy court's analysis, Debtor contends
24 that the 2005 asparagus crop did not come into existence until
25 after the commencement of the case. Since this was a "new crop,"
26 Debtor insists Bank's security interest would not be subject to
27 Bank's lien under § 552(a). Debtor provides a complex analysis of
28 California Commercial Code provisions in an attempt to explain how
 the asparagus crop should be deemed free and clear of Bank's
 interests. He discusses whether the asparagus beds are "fixtures"
 or "equipment" as those terms are defined in the UCC, and the
 distinctions between a growing crop as personalty or real estate
 under the UCC.¹³

25 ¹³ Debtor, in passing, cites an article recounting an
26 interview with Professor Peter F. Coogan, the author of Secured
27 Transactions Under the Uniform Commercial Code (Lexis, 2000) to
28 support his argument. Peter F. Coogan, Crop Financing and Article
 9: A Dialogue With Particular Emphasis on the Problems of Florida
 Citrus Crop Financing, 22 U. MIAMI L. REV. 13, 32-33 (1967-1968).

(continued...)

1 Rather than engage in an extensive UCC analysis, we believe
2 the bankruptcy court undertook the correct approach. For example,
3 the bankruptcy court relied in part on In re Beck, 61 B.R. 671
4 (Bankr. D. Neb. 1985), a bankruptcy court decision in which we
5 think the issue is correctly analyzed.

6 The debtors in Beck were alfalfa farmers. The Beck court
7 determined that alfalfa is a perennial crop, in that each spring
8 the existing alfalfa plants grow to maturity, thereby yielding a
9 new crop for cutting. The debtor entered into a security
10 agreement with a bank and granted it a security interest in "all
11 farm products including but not limited to . . . crops . . . both
12 annual and perennial crops and the natural increase and products
13 thereof." In re Beck, 61 B.R. at 671. In debtor's subsequent
14 bankruptcy case, debtor asked the bankruptcy court to determine
15 the bank's secured status as to the post-petition cuttings of
16 alfalfa produced on a field that was planted before bankruptcy.

17 The Beck court concluded that the bank's security interest

18
19

20 ¹³(...continued)

21 From his interview comments, the professor apparently believes:
22 (1) The UCC is unclear whether, when the term "crop" is used in a
23 UCC security agreement, it refers to only a single crop, or to the
24 cumulative output of crops from a particular source, the essential
25 question presented to the Panel; (2) an agreement [here, such as
26 that between Debtor and Bank] that grants a security interest to a
27 creditor in the debtor's future crops is binding as to the parties
28 to the agreement; and (3) Professor Coogan cannot imagine a
situation in which a creditor with a properly recorded financing
statement evidencing a security interest on future crops would be
deprived of its priority under the UCC. In short, Professor
Coogan opines that while the UCC may have some relevance in
understanding when a secured party may assert rights under the UCC
(e.g., whether a personal property security interest can be
terminated in a real estate foreclosure proceeding), the UCC is
either unclear, or of limited legal significance, in determining
under bankruptcy law whether a pre-petition security interest in
asparagus crops extends to the debtor's post-bankruptcy crops.

1 continued in the successive cuttings of the alfalfa crop raised
2 after bankruptcy. Noting the dearth of case law interpreting
3 § 552(a) and (b)(1), the court observed "That may be because the
4 language of the security interest is clear, the language of the
5 Code is clear and it is clear to counsel for most debtors that
6 alfalfa plants are perennials and the successive crops are the
7 natural increase and products of the original plant." In re Beck,
8 61 B.R. at 673. The court ruled that the bank's security interest
9 was not terminated by operation of § 552(a) when debtor filed his
10 petition.

11 The central holding in Beck was that the security interest
12 continued in the natural increase and products of alfalfa because
13 it was a perennial. This conclusion agrees with the California
14 courts, which have consistently held that asparagus is a
15 perennial. "Asparagus is grown from roots which are perennial,
16 and being once planted produce the asparagus of commerce for many
17 successive years." Meek v. Cunha, 8 Cal. App. 98 , 100 (Ct. App.
18 1st Dist. 1908); Chan Kiu Sing v. Gordon, 171 Cal. 28 (1915) ("The
19 roots of asparagus are perennial . . . the profits come from the
20 shoots which grow therefrom each year."); Eberhardt v. Bass, 39
21 Cal. 2d 1, 8 (1952) (asparagus beds are perennials). The one
22 federal court to address whether asparagus was a perennial dealt
23 with a California farm. Sonoda v. United States, 154 Ct. Cl. 130
24 (1961) ("Asparagus is a perennial crop and will keep producing for
25 as much as 25 years before playing out.").¹⁴

26

27
28 ¹⁴ Other state courts have also ruled that asparagus is a
perennial. E.g., Leigh v. Lynch, 493 N.E.2d 1040, 1043 (Ill.
1986) ("asparagus is a perennial crop").

1 Beck is also consistent with our own interpretation of
2 § 552(b) in In re Dettman, 84 B.R. 662 (9th Cir. BAP 1988). In
3 that appeal, the panel analogized certain government diversion
4 payments made to a farmer to raisins produced from a perennial
5 grapevine. In holding that the creditor's security interest
6 attached to the post-bankruptcy government program payments, the
7 panel made these instructive comments concerning interpretation
8 of § 552:

9 A security interest in crops attaches when the
10 crops are planted. As a result, under section
11 552, where crops are planted prepetition, a
12 proceeds clause in a security agreement
13 protects the creditor's interest in the crop
14 and its proceeds postpetition. See 11 U.S.C.
 § 552(b). However, where crops are planted
 postpetition, a proceeds clause does not
 protect the creditor's security interest
 because the crops were not in existence prior
 to the bankruptcy filing.

15 In this case, there is no factual dispute that Debtor's post-
16 petition crops were grown on asparagus beds which he had acquired
17 and planted several years before Debtor filed for bankruptcy
18 relief. While Debtor may have utilized bankruptcy estate assets
19 in producing the post-petition crops (something which the
20 bankruptcy court found significant later in its "equities of the
21 case" analysis), the 2004 and later asparagus crops were clearly
22 products of the Bank's pre-bankruptcy collateral: the asparagus
23 beds and plants. Bank's security interest, outside bankruptcy,
24 would attach to Debtor's yearly crop, something Debtor does not
25 seem to challenge. And while the general rule under § 552(a) is
26 that a security interest does not extend to property a debtor
27 acquires after bankruptcy, Bank's security interest continued in
28

1 effect in the crops raised on existing asparagus beds after
2 bankruptcy under the statutory exception in § 552(b)(1).

3 We conclude that the bankruptcy court's decision recognizing
4 that Bank's security interest extended to Debtor's post-petition
5 asparagus crops produced by the existing asparagus beds was based
6 upon a sound analysis of the undisputed evidence and a proper
7 application of the Code and case law. As a result, we believe
8 that the bankruptcy court did not abuse its discretion in
9 declining to confirm Debtor's plan because the Plan did not treat
10 Bank's allowed secured claim attributable to the asparagus crops
11 as required by § 1225(a)(5).

12 **II. Bank's Cross-Appeal, EC-05-1389**

13 Because the Panel, in the above discussion, affirms the
14 decision of the bankruptcy court to deny confirmation of the Plan,
15 the issues raised by Bank in its Cross-Appeal are rendered moot,
16 and that appeal must be dismissed. Put another way, since Bank's
17 complaints all focus on the bankruptcy court's unwillingness to
18 endorse Bank's other objections to confirmation, this Panel need
19 not take a position on the propriety of the court's rulings on
20 Bank's specific objections.

21 But even though the Cross-Appeal will be dismissed, we feel
22 it is useful to comment on the substance of the issues raised by
23 Bank. As noted above, this is an interlocutory appeal, and
24 further proceedings will occur in the bankruptcy court after our
25 decision. It is possible, perhaps even likely, that the
26 bankruptcy court will allow Debtor an opportunity to propose yet
27 another amended plan in light of this Panel's decision concerning
28 Debtor's appeal, and the bankruptcy court's decision that Bank's

1 security interest not attach to Debtor's 2005 and 2006 asparagus
2 crops, a ruling reviewed below. Since the issues raised by Bank
3 in its Cross-Appeal involving appropriate interest rates,
4 feasibility and disposable income requirements may potentially
5 recur in connection with the bankruptcy court's consideration of
6 confirmation of another amended plan, in the interests of justice
7 and judicial economy, the Panel deems it prudent to review and
8 discuss those issues here. While the Panel's observations that
9 follow are not binding, hopefully the insight provided in this
10 following analysis will be helpful.

11

12 A. The bankruptcy court must make express findings and
13 conclusions regarding the adequacy of any interest rate for
14 payments to be made on Bank's allowed secured claim under
15 § 1225(a)(5)(B)(ii) based upon the evidence presented in this
16 bankruptcy case.

17 In its Cross-Appeal, Bank argues that the bankruptcy court's
18 determination of the adequacy of the six percent interest rate
19 proposed by Debtor for its secured claims was error. Debtor
20 replies that "there are many factors which support the bankruptcy
21 court's finding that a 6% rate of interest for the Bank's secured
22 claims was appropriate under the Till formula approach." However,
23 even though the parties' arguments presume a decision was made by
24 the bankruptcy court, in our review of the record, we can find no
25 indication that the court ever made any express determination of
26 the adequacy of the interest rate in Debtor's case under Till.

27 We think the considerable confusion in the record concerning
28 whether the bankruptcy court considered the adequacy of the

1 interest rate on Bank's allowed secured claims in Debtor's
2 bankruptcy case arises from at least two sources.

3 First, there were two closely related, but separate,
4 bankruptcy cases pending before the bankruptcy court: the
5 Debtor's case and the Parents Case. Counsel for the debtors and
6 Bank were the same in both cases, as was the trustee. "Back-to-
7 back" hearings were conducted on May 3 and 19, 2005, in both
8 cases, and there are occasional cross-references in the
9 transcripts of those hearings to events occurring in the "other"
10 case.

11 Second, the bankruptcy court made a reference in its
12 Memorandum Decision that it had continued the May 3, 2005, hearing
13 in the Debtor's case to May 19, 2005, for determination of two
14 issues, one of which was adequacy of the interest rate. However,
15 the Memorandum Decision then makes no further reference to the
16 interest rate issue and, as noted below, there was no mention of
17 the adequacy of the proposed interest rate in the hearings in the
18 Debtor's case.

19 Indeed, we have examined all the pleadings filed by the
20 parties in the bankruptcy court in Debtor's case, and it appears
21 there was no objection to the interest rate raised by Bank, nor
22 any defense of the proposed interest rate offered by Debtor.
23 However, we have also examined the transcript of the May 3, 2005,
24 hearing in the Parents Case, of which we have taken judicial
25 notice,¹⁵ and there was extensive discussion of the interest rate
26
27

28 ¹⁵ See, supra, note 6.

1 in the Parents Case.¹⁶

2 The bankruptcy court made no findings at the May 3, 2005,
3 hearing in the Parents Case on the adequacy of the interest rate
4 in the Parents Case. We also have no explanation in the record
5 before us of the court's reasoning for its final determination of
6 the adequacy of the six percent interest rate in the Parents Case.
7 However, even if we did, it would be irrelevant to our
8 consideration of the adequacy of the interest rate in any plan
9 proposed by Debtor. The bankruptcy court must determine the
10 adequacy of that rate based upon the evidence presented in
11 Debtor's case, not the Parents Case. The reason for this
12 distinction is found in the cases interpreting the Code.

13 The parties agree that the controlling law concerning the
14 standard for determining the appropriate rate of interest to be
15 paid to a secured creditor under a cramdown plan provision is Till
16 v. SCS Credit Corp., 541 U.S. 465, 479-80 (2004):¹⁷

17

18 ¹⁶ We have taken judicial notice only of the transcript of
19 the May 3, 2005, Parents Case hearing. Although we do not take
20 judicial notice of any other documents in the Parents Case, we are
21 also aware of the later developments in that case because, as
22 noted above, it was also before us on appeal. We are therefore
aware that the bankruptcy court at the May 19, 2005, hearing in
the Parents Case approved a six percent interest rate for the
Bank's secured indebtedness.

23 ¹⁷ Bank appears to understand that Till was a chapter 11
24 case. See Bank's Reply Brief at 9 (after citing Till - and no
25 other cases - Bank comments, "The leading treatise reflects that
the standards developed in chapter 11 cases are generally relevant
26 to chapter 12 cases.") Of course, Till was a chapter 13 case, and
the court was interpreting § 1325(a)(5)(B). In any event, while
27 the Supreme Court did not hold so expressly, because the language
of § 1225(a)(5)(B)(ii) mirrors that of the provision addressed in
28 Till, we agree with the parties that Till provides the appropriate
analytical framework for determining plan interest rates under
chapter 12. Till, Id. at 474 n. 10 (indicating that it was
"likely" that same approach to fixing interest rate in plans
applied under other reorganization chapters).

1 The approach begins by looking to the national
2 prime rate, reported daily in the press, which
3 reflects the financial market's estimate of
4 the amount a commercial bank would charge a
5 creditworthy commercial borrower to compensate
6 for the opportunity costs of the loan, the
7 risk of inflation, and the relatively slight
8 risk of default. Because bankrupt debtors
9 typically pose a greater risk of nonpayment
10 than solvent commercial borrowers, the
11 approach then requires a bankruptcy court to
12 adjust the prime rate accordingly. The
13 appropriate size of that risk adjustment
14 depends, of course, on such factors as the
15 circumstances of the estate, the nature of the
16 security, and the duration and feasibility of
17 the reorganization plan.

10 In this excerpt, the court describes the so-called "formula"
11 approach whereby, in determining the adequacy of a plan interest
12 rate, a bankruptcy court first considers "no risk" rate for
13 interest, and then adjusts it to reflect the various risk factors
14 implicated by the facts of a particular bankruptcy case.¹⁸
15 Specifically, those criteria include the circumstances of the
16 estate, the nature of the security, and the duration and
17 feasibility of the reorganization plan. The evidentiary burden of
18 justifying an upward adjustment in the risk-free rate is on the
19 creditor. Id. at 480.

20 Whatever decision the bankruptcy court may have reached in
21 the Parents Case is irrelevant to determining whether the Plan's
22 interest rate is adequate because the facts and circumstances

24 ¹⁸ While Till controls, we note its lessons are consistent
25 with those announced in the Ninth Circuit and this Panel's prior
26 decisions. In Patterson v. Fed. Land Bank (In re Patterson), 86
27 B.R. 226, 229 (9th Cir. BAP 1988), we affirmed the bankruptcy
28 court's determination that a plan interest rate in a chapter 12
case was adequate where the bankruptcy court applied a formula
approach, beginning with the Prime Rate, and adjusting upward for
case-specific risks. See also, Farm Cred. Bank v. Fowler (In re
Fowler), 903 F.2d 694, 696 (9th Cir. 1990).

1 surrounding Debtor's operation will be fundamentally different.
2 Debtor is not his parents - he is younger, with a shorter work
3 history. Debtor's crops are different from those produced in his
4 parents' operation. The total secured indebtedness is
5 significantly different (approximately \$60,000 for Debtor and
6 \$550,000 for Parents). And the duration of the proposed
7 reorganization plans is different (three years for Debtor and four
8 to five months for Parents).

9 In summary, any decision concerning the adequacy of an
10 interest rate proposed for payment on Bank's allowed secured claim
11 must be supported by appropriate findings of fact based upon the
12 evidence to be submitted in Debtor's case, and analyzed in light
13 of the Till factors. See, Idaho Watersheds Project v. Hahn, 307
14 F.3d 815, 834 (9th Cir. 2002) (holding that findings must be
15 "sufficiently specific to permit fair appellate review of the
16 manner in which the trial court resolved the issues upon which its
17 judgment depends.")

18

19 B. The bankruptcy court conducted an appropriate analysis of
20 the feasibility of the Plan for purposes of § 1225(a)(6).

21 To secure confirmation of a plan, § 1225(a)(6) required
22 Debtor to establish that he "will be able to make all payments
23 under the plan and to comply with the plan." Whether a plan is
24 feasible is a factual determination made by the bankruptcy court
25 and reviewed by the Panel under a clearly erroneous standard. In
26 re Nauman, 213 B.R. at 357. In making his showing, Debtor is not
27 required to guarantee the ultimate success of the Plan, but only
28 to provide a reasonable assurance that the Plan can be

1 effectuated. Id., citing In re Hopwood, 124 B.R. 82, 86 (E.D. Mo.
2 1991). Simply put, § 1225(a)(6) does not require a plan to be
3 "bomb proof." In re Nauman, 213 B.R. at 361. Many courts have
4 held that a chapter 12 debtor should be given the benefit of the
5 doubt regarding the issue of feasibility when the debtor's plan
6 projections, based upon reasonable inputs in light of the current
7 economic climate, indicate that it is probable that the debtor can
8 make the plan payments. Farmers Home Admin. v. Rape (In re Rape),
9 104 B.R. 741, 748 (W.D.N.C.1989); see also, In re Hopwood, 124
10 B.R. at 86 (purpose of chapter 12 is to promote reorganizations of
11 family farmers, and court should give benefit of doubt to debtor
12 on issue of feasibility); In re Krause, 261 B.R. 218, 224 (8th
13 Cir. BAP 2001) (feasibility showing in chapter 12 only requires
14 reasonable assurance that the plan can be completed and that there
15 will be sufficient cash flow).

16 In this case, Debtor supported the feasibility of the Plan by
17 submission to the bankruptcy court of a nine-page projection of
18 income and expenses. Debtor's budget forecast projected farm
19 income for the 2004-2005 season at \$655,978, and projected
20 operating expenses of \$653,741, resulting in a positive margin of
21 \$2,237. The bankruptcy court also had access to earlier budgets
22 from 2002 and 2003.

23 In addition to income and expense forecasts, at the May 19,
24 2005, hearing, Debtor submitted the declaration and testimony of
25 Miller, whose employer, JMB, is a direct marketer of asparagus for
26 asparagus growers. According to Bank,

27 Mr. Miller provided testimony to the effect
28 that JMB was in the position to, and would,
advance such funds as were necessary to fund
the Debtor's 2005 asparagus operations, with

1 the implication being that JMB would continue
2 to do so in future crop years. On appeal, the
Bank does not dispute that testimony.^[19]

3 (Emphasis added). Thus, contrary to the Bank's suggestion that
4 Debtor provided inadequate information as to the feasibility of
5 his proposed operation, it instead appears that the bankruptcy
6 court was given substantial competent evidence on this issue.

7 Bank apparently bases its appeal of the bankruptcy court's
8 feasibility finding on what it contends is the "illusory" nature
9 of Debtor's income and expense projections. In this regard, Bank
10 cites Miller's testimony that Debtor would produce approximately
11 5,000 cartons of asparagus less in 2005 than Debtor had projected
12 in 2004. However, Miller also stated that the 2005 price would be
13 \$35 per carton, an increase of \$4 per carton over projections.

14 On August 26, 2004, Debtor filed an amended Schedule J
15 adjusting his projected 2005 asparagus production volume up to
16 18,700 cartons. Debtor testified at the confirmation hearing that
17 such production estimates were based upon a normal crop harvest
18 for his asparagus beds. Debtor explained that by the time of
19 harvest in April and May 2005, it was apparent he would not meet
20 his projected production volume because of unfavorable weather
21 conditions. Debtor also explained that asparagus is a cash crop
22 highly dependent upon supply and demand. On the other hand,
23 Debtor's expenses also declined with the reduced volume.

24
25 ¹⁹ The Miller Declaration reads, in part:

26 ¶ 7. JMB anticipates continuing to serve as
27 the debtor's direct marketer of asparagus
28 throughout the three-year term of the debtor's
First Amended Chapter 12 Plan and anticipates
continuing to extend asparagus crop financing
for that period on the same terms and
conditions.

1 Farming operations are subject to certain risks, including
2 natural factors like the weather, market influences, and even
3 changes in government farm policies. In re Davenport, 158 B.R.
4 830, 833 (Bankr. E.D. Cal. 1992) (any farming operation is subject
5 to loss on occasion). Consequently, projections submitted by a
6 chapter 12 debtor to support feasibility of a proposed plan will,
7 of necessity, include assumptions and educated guesses about
8 factors beyond the debtor's control. In re Konzak, 78 B.R. 990,
9 994 (Bankr. D.N.D. 1987) (instructing that chapter 12 plan
10 feasibility must be established based upon "presently existing"
11 information, because "[n]o one can predict what prices will be in
12 the future and it is folly to peg feasibility upon future yields
13 and market prices which are at best often unpredictable and at
14 worst even imaginary.").

15 In this case, the bankruptcy court observed that, although
16 weather may have caused a decline in Debtor's production in 2004,
17 it also resulted in higher per carton income for the asparagus
18 Debtor produced. As a result, while Debtor's preseason budget
19 projections about yields and prices were not precisely accurate
20 when compared to actual results, Debtor's projections of net
21 income had been validated. This evidence was sufficient to
22 support the bankruptcy court's finding that the Plan was feasible.

23 The bankruptcy court considered Debtor's evidence that, based
24 upon his projections, his operation would "cash flow" and he could
25 generate sufficient income to make the payments proposed in the
26 Plan. The court also was given the testimony and declaration of
27 Miller showing that JMB would provide financing for Debtor's
28 operation. Bank did not effectively challenge Miller's testimony

1 or Debtor's projections. Finally, Debtor's projections, while
2 perhaps incorrect in some of the details, were validated by the
3 actual results of the farming operation. Bank's argument that
4 Debtor's projections were illusory because they were based on a
5 one-year aberration in the market was considered by the bankruptcy
6 court, which determined that any alleged inconsistency was of no
7 moment.

8 In reviewing the bankruptcy court's finding that a plan is
9 feasible for purposes of § 1225(a)(6), we give special deference
10 to its credibility findings. Here, the bankruptcy court did not
11 clearly err in finding that the Plan was feasible for purposes of
12 § 1225(a)(6).

13

14 C. The bankruptcy court correctly decided that the Plan satisfied
15 the requirements of § 1225(b)(1)(B) requiring that all of a
16 debtor's projected disposable income be applied to plan payments.

17 Section 1225(b)(1)(B) provides:

18 (b)(1) If the trustee or the holder of an
19 allowed unsecured claim objects to the
20 confirmation of the plan, then the court may
21 not approve the plan unless, as of the
22 effective date of the plan . . .

21 (B) the plan provides that all of the debtor's
22 projected disposable income to be received in
23 the three-year period . . . will be applied to
24 make payments under the Plan.

24 (Emphasis added.)

25 As it did in the bankruptcy court, Bank persists in arguing
26 on appeal that the Plan failed to satisfy this confirmation
27 standard:

28 Unsecured creditors are not substantively
being provided with any payment dividend on

1 unsecured claims. This in part occurs because
2 the Debtor refused to commit all of his net
3 disposable income to payment of such claims
but would only commit to pay his projected
income.

4 Bank's argument implies that Debtor must devote his actual
5 disposable income, rather than his projected disposable income, to
6 making payments under the Plan. This argument was rejected by the
7 bankruptcy court because "Section 1225(b) is satisfied if the Plan
8 requires the debtor to devote all of his projected disposable
9 income to the Plan for a three-year period or longer if necessary"
10 (emphasis in original), citing Anderson v. Satterlee (In re
11 Anderson), 21 F.3d 355 (9th Cir. 1994).²⁰

12 The bankruptcy court's reliance upon the Anderson analysis is
13 apropos because in its decision the Ninth Circuit directly
14 addressed the issue raised by Bank's objection, i.e., whether the
15 Bankruptcy Code requires a debtor to devote all of its actual net
16 disposable income to payment of claims. The Ninth Circuit held:

17 This argument [that a debtor must pay all
18 actual disposable income into the plan] has a
fatal flaw: § 1325(b)(1)(B) does not require
19 debtors to give such an assurance. Instead,
§ 1325(b)(1)(B) requires provision for
20 "payment of all projected disposable income"
as calculated at the time of confirmation, and
21 we reject the Trustee's attempt to impose a
different, more burdensome requirement on the
22 debtors' plan as a prerequisite to
confirmation.

23
24 ²⁰ Anderson is a chapter 13 case interpreting § 1325(b).
25 However, because the confirmation criteria of § 1225 are nearly
identical to those of § 1325, "case law interpreting section 1325
26 will be relevant in interpreting section 1225." 8 Lawrence P.
King, et al., COLLIER ON BANKRUPTCY ¶ 1225.01, 1225-3 (15th ed. rev.
27 2005); In re Kjerulf, 82 B.R. 123, 126 (Bankr. D.Or. 1987) (chapter
12 closely modeled on chapter 13). In particular, except for a
28 restriction only applicable to chapter 12 debtors, § 1225(b)(1)(B)
is identical to § 1325(b)(1)(B).

1 In re Anderson, 21 F.3d at 358 (9th Cir. 1994) (emphasis in
2 original). The Ninth Circuit elaborated that the intention of
3 Congress was clear on the face of the statute that it was
4 projected, not actual, disposable income that a debtor must devote
5 to plan payments and there was no need to examine the legislative
6 history to determine Congress' intention. Id. at 358 n. 6.

7 The Plan provides that all of Debtor's future income will be
8 submitted to the trustee as is necessary for execution of the
9 Plan. The Plan also provides that all of Debtor's projected
10 disposable income to be received during the next three years would
11 be paid, pro rata, to unsecured creditors, but not less than a
12 total of \$5,000. Despite these provisions committing Debtor's
13 projected disposable income to payments under the Plan, and the
14 Ninth Circuit's unambiguous ruling in Anderson, Bank insists the
15 Plan does not comply with the requirements of § 1225(b)(1). Bank
16 cites no authority for its position. We conclude that the
17 bankruptcy court did not err in overruling Bank's objection.

18 19 **III. Bank's Appeal, EC-06-1148 and 1149**

20 A. The bankruptcy court did not abuse its discretion when
21 it decided, under § 552(b)(1), that Bank's security interest
22 should not extend to Debtor's 2005 and 2006 asparagus crop based
23 upon the "equities of the case."

24 As noted above, § 552(b)(1) provides that a prepetition
25 security interest will attach to certain types of bankruptcy
26 estate property "except to any extent that the court, after notice
27 and a hearing and based on the equities of the case, orders
28 otherwise." Under authority of this provision, the bankruptcy

1 court, after a hearing, ordered that Bank's lien would not attach
2 to Debtor's 2005 and 2006 asparagus crop.

3 Bank argues that the bankruptcy court erred in doing so for
4 several reasons. Bank argues in its briefs that § 552(b)(1) is
5 vague and unconstitutional. We dispose of Bank's constitutional
6 challenge below. However, with respect to Bank's contention that
7 the phrase "equities of the case" is "vague and contains no
8 standards upon which a lender can establish a formula upon which
9 it can properly assess and thereby attempt to price credit", we
10 simply disagree.

11 "Equities of the case," as that phrase is used in
12 § 552(b)(1), is anything but vague. Four courts of appeal have
13 assigned a nearly identical meaning to this provision. For
14 example, in New Hampshire Bus. Dev. Corp. v. Cross Baking Co.,
15 Inc. (In re Cross Baking Co., Inc.), the court explains:

16 [T]he equities of the case proviso is a
17 legislative attempt to address those instances
18 where expenditures of the estate enhance the
19 value of proceeds which, if not adjusted,
20 would lead to an unjust improvement of the
21 secured party's position. In such cases,
22 Congress intended for courts to limit the
23 secured party's interest in the proceeds
24 according to the equities of the case so as to
25 avoid prejudicing the unsecured creditors.

26 818 F.2d 1027, 1033 (1st Cir. 1987). Another court observed that

27 The equity exception is meant for the case
28 where the trustee or debtor-in-possession uses
other assets of the bankruptcy estate (assets
that would otherwise go to the general
creditors) to increase the value of the
collateral. . . . The proceeds . . . would
be added to the secured creditor's collateral
unless the court decided that it would be
inequitable to do so - as well it might, since
the general creditors were in effect
responsible for much or all of the increase in

1 the value of the proceeds over the original
2 collateral.

3 In re J. Catton Farms, Inc., 779 F.2d 1242, 1246-47 (7th Cir.
4 1985), citing In re Village Properties, Ltd., 723 F.2d 441, 444
5 (5th Cir. 1984) (approving limitation of secured creditor's pre-
6 bankruptcy lien "where raw materials are converted into inventory
7 at the expense of the estate (which would thus deplete the fund
8 available for the general unsecured creditors)"); accord United
9 Va. Bank v. Slab Fork Coal Co., 784 F.2d 1188, 1191 (4th Cir.
10 1986).

11 No circuit case law attributes a different meaning to this
12 phrase. Contrary to Bank's position, the cases interpreting the
13 equities of the case exception make clear its principal purpose is
14 to prevent secured creditors from reaping unjust benefits from an
15 increase in the value of collateral during a bankruptcy case
16 resulting from the debtor's use of other assets of the estate, or
17 from the investment of non-estate assets. Those creditors are
18 presumably able, and expected, to consider the operation of this
19 statute, and any accompanying risk, when crafting and pricing
20 credit arrangements with their borrowers.

21 Given the universal meaning assigned to this provision, we
22 conclude the bankruptcy court correctly applied the statute to the
23 facts. Indeed, this appeal presents a near classic scenario for
24 operation of this provision of the Code.

25 The bankruptcy court conducted a hearing concerning Debtor's
26 Motion for Determination of Postpetition Effect of Security
27 Interest on January 18, 2006. At the hearing, the court was given
28 the declarations of counsel for the Bank and from Debtor, and

1 heard further representations and argument from counsel for both
2 parties.

3 Debtor provided evidence that he had used \$36,626 of estate
4 funds that were not subject to the Bank's security interest, and
5 that would otherwise have been available to pay creditors, during
6 the season to preserve the asparagus beds and cultivate the 2005
7 crop. The total surplus of income over expenditures in the 2005
8 crop was approximately \$20,000. The bulk of the money to finance
9 production of the asparagus crop production was "fronted" by the
10 buyer of the crop. Although Bank asserted that \$12,000 of its
11 cash collateral was used in the harvesting of the 2005 crop, the
12 court found that "none of the bank's cash collateral was used for
13 production of the 2005 asparagus crop."²¹

14

15

16 ²¹ Bank introduced confusion in the record regarding this
17 \$12,000 payment and, in context, appeared to assert that it was
18 used in production of the 2005 crop. At the hearing on January
18, 2006, the following exchange occurred between counsel for Bank
and the court:

19 THE COURT: But does the Bank acknowledge that
20 none of its collateral-cash collateral was
used for harvesting the 2005 crop?

21 HAUSER: No. The debtor has already indicated
22 he used \$12,000 of what we contend is bank
money for some purpose.

23 Tr. Hr'g 14:17-22 (January 18, 2006).

24 The \$12,000 at issue here, according to debtor, was \$12,109
25 of cash income from the 2005 crop used to prepare for the 2006
26 crop. Tr. Hr'g 8:2-4. Based on this conflicting testimony, we
cannot determine whether the \$12,109 of cash proceeds was used to
27 finance the completion of the 2005 or preparation of the 2006
harvests. But regardless of the actual purpose to which the
\$12,109 was put, the court's ruling is consistent with its
28 determination that cash proceeds in either year were not subject
to the bank's liens.

1 As a condition of the court's order, Debtor was required to
2 place sufficient funds in a segregated interest-bearing account to
3 satisfy Bank's secured claim attributable to its interest in the
4 Debtor's leasehold in the asparagus beds. Debtor also provided
5 evidence that he had sufficient income to fund the other payments
6 under the Plan, including those to Bank for its secured claim on
7 Debtor's equipment. In other words, under the court's order and
8 the terms of the Plan, while the asparagus beds and equipment
9 subject to Bank's lien had been used to produce the current
10 asparagus crop, Debtor was prepared to compensate Bank by payments
11 on its secured claims relating to that collateral. The evidence
12 suggested that the results of the 2006 season would be similar.

13 Based on this evidence, and in light of the purpose of the
14 statute and the case law interpreting "equities of the case" in
15 § 552(b)(1), the bankruptcy court did not abuse its discretion in
16 determining that Bank would receive an inequitable windfall at the
17 expense of the unsecured creditors if its lien attached to the
18 2005 and 2006 asparagus crop. Freeing up the crop proceeds would
19 allow Debtor to fund the Plan, pay his plan payments to creditors,
20 and continue his operation. In limiting the reach of Bank's
21 security interest, the bankruptcy court struck "an appropriate
22 balance between the rights of secured creditors and the
23 rehabilitative purposes of the Bankruptcy Code." United Va. Bank
24 v. Slab Fork Coal Co., 784 F.2d at 1191.

28 //

1 B. Because Bank failed to properly raise the constitutional
2 issue in the bankruptcy court, we decline to review it on appeal.

3 In an ambitious argument to the Panel,²² Bank contends that
4 the decision of the bankruptcy court to terminate Bank's security
5 interest in Debtor's post-petition asparagus crops pursuant to
6 §552(b) (1) without requiring compensation be paid to Bank
7 constituted a violation of the Takings Clause of the United States
8 Constitution.²³ Both Bank and Debtor agree that there is sparse
9 case law on the constitutionality of §552(b) (1).²⁴

10 As Bank's counsel conceded at oral argument, Bank did not
11 fairly challenge the constitutionality of application of
12 § 552(b) (1) in this context in the bankruptcy court.²⁵ Generally,
13

14 ²² The Bank, in its brief states: "In the pending action
15 under a vague clause which is otherwise undefined in the Code, a
16 valuable property right of the Appellant [Bank] was taken for
17 which the Appellant [Bank] will receive no compensation."
18 Respondent's Opening Brief at 13. To the extent that the Bank is
19 arguing that § 552(b) is unconstitutionally vague, the legislative
20 history and case law discussed in the last section above
21 demonstrate otherwise. We focus here on the Bank's express
22 argument that the application of the statute violated its Fifth
23 Amendment right to just compensation.

24 ²³ ". . . nor shall private property be taken for public
25 use, without just compensation." U.S. CONST. amend. V.

26 ²⁴ The one case cited by either party that considered the
27 constitutionality of § 552(b) was In re Hamilton, 18 B.R. 868
28 (Bankr. D.Colo. 1982). As can be seen from the citation, this is
a 25-year old trial court decision from another circuit. A review
of the case law indicates that it has never been cited by an
appeals court for any purpose. However, we note in passing that
the Hamilton court held that § 552 was constitutional in its
entirety.

²⁵ In Bank's Supplemental Opposition to Debtor's Motion to
Determine Postpetition Effect of Security Interest, Bank suggests
that the constitutionality of § 552 is "unclear" and that "[t]his
Court need not reach the constitutional issue if it decides that
the equities of the case otherwise requires [sic] that the status
quo be maintained while an appellate court addresses the legal
(continued...)

1 appellate courts do not consider arguments "that are not 'properly
2 raise[d]' in the trial courts." O'Rourke v. Seaboard Sur. Co. (In
3 re Fegert, Inc.), 887 F.2d 955, 957 (9th Cir. 1989). Concrete
4 Equip. Co., Inc. v. Fox (In re Vigil Bros. Constr., Inc.), 193
5 B.R. 513, 520 (9th Cir. BAP 1996). The Ninth Circuit recognizes
6 three narrow, discretionary exceptions to the general rule: (1) to
7 prevent a miscarriage of justice or to preserve the integrity of
8 the judicial process; (2) when a change in law raises a new issue
9 while an appeal is pending; and (3) when the issue is purely one
10 of law. Jovanovich v. United States, 813 F.2d 1035, 1037 (9th Cir.
11 1987), citing Bolker v. Comm'r, 760 F.2d 1039, 1042 (9th Cir.
12 1985).

13 Although Bank's constitutional challenge presents an issue of
14 law, because this is an interlocutory appeal, and no plan has yet
15 been confirmed, Bank is free to raise this issue again in the
16 bankruptcy court at the time Debtor proposes another plan for
17 confirmation. The constitutionality of the application of the
18 "equities of the case" exception to Bank's lien can then be
19 examined in the specific context of a plan's provisions. Since
20 this remedy is available to Bank, we do not find that any of the
21 three exceptions above to the rule against considering new
22 arguments on appeal should apply here. Consequently, we decline
23 to consider this issue on appeal.

24
25 ²⁵(...continued)
26 issue of the extent of the Bank's security interest in
27 postpetition revenues." Bank did not explain this argument to the
28 bankruptcy court, support it with any law or reasoning, or argue
it in any additional pleading or hearing. We agree with Bank's
counsel's comments at oral argument acknowledging that the
constitutional argument was not adequately raised in the
bankruptcy court.

1 **CONCLUSION**

2 In Debtor's Appeal, EC-05-1290, we AFFIRM the bankruptcy
3 court's denial of confirmation of the Plan because it failed to
4 provide for Bank's allowed secured claim as to the asparagus
5 crops.

6 While we have provided guidance to the parties concerning the
7 issues raised in Bank's Cross-Appeal, EC-05-1389, because we
8 affirm denial of confirmation of Debtor's plan for other reasons,
9 those issues are moot, and that appeal is DISMISSED.

10 We AFFIRM the orders of the bankruptcy court in Bank's
11 Appeal, EC-06-1148 and 1149.
