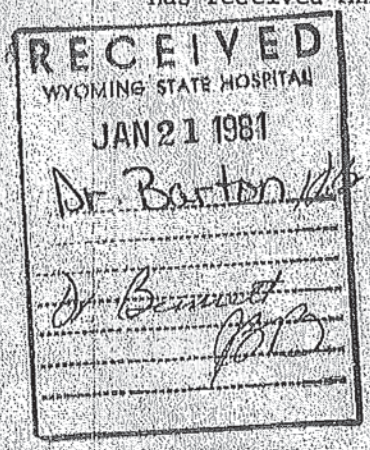
PHYSICAL EXAMINATION

Request for Psychiatric Consultation Date 1-16-81

Reason for Referral: Has received MHB. May he be released? Is he dangerous to self or others?



George P. Pbtokhen, M.D
REFERRING PHYSICIAN

Report of Consultant: Date Seen 1-19-81

This patient was referred for release Friday as having received MHB. Later in evening he became obstructive and refused to go to bed. He was forcibly removed to Sublette Hall and there interviewed today.

He does not appear a danger to himself or others. He has apparently received MHB. I do not believe he can gain anything significant by further retention. I recommend release as soon as appropriate arrangements can be made.
