DOCTORS' ORDERS &
P.O.M.R. TREATMENT PLAN 202

12-18-80 - ADDENDUM TO SOCIAL HISTORY:

During a routine investigation to confirm the information gathered from the patient containe in the social history, additional information was gathered and this information indicates th the patient was not entirely truthful. However, some of the information gathered from outside sources does not coincide and the entire truth will probably never be known. During a telephone interview with Nancy Perry (who calls herself Mrs. Dennis Ward) the following information was obtained. In August 1980 Daniel came to her home with two of her friends who she refused to name. The boys were looking for work, couldn't find any, so her two frie returned to Idaho and Daniel stayed with them. He was to find a job but didn't attempt to d so. He did a few chores around the house and watched a lot of T.V. She bought him over $20 worth of clothing. Nancy said that he did go to A.A. meetings and appeared to be in a bett mood following the meetings. She further stated that Daniel must have called the ambulance after his suicide attempt as no one else could have made the call. Nancy said that her new tape recorder, valued at $40, is missing and a friend's paycheck amounting to $300 is also missing. This paycheck has never been cashed.

During a telephone interview with the Chief of Police of the Salmon, Idaho Police Department the following information was obtained. Daniel has been some problem in the community and l resided in Salmon for about one and a half years. He has been arrested for public intoxicat a couple of times and did steal a school van "totally wrecking it." The school board has dropped all charges and there is no legal problem at this time. Daniel is to make restitutio as he is able to make payments. The police officer said that Daniel ran with a bunch of you trouble-makers. The police officer stated that Daniel was living in a foster home and his foster mother was Barbara Williamson.

During a telephone interview with Barbara Williamson the following information was obtained. Barbara and her husband met Daniel in California at a Boy Scout Camp when he was eight or nin years of age. She knows of Daniel as she lived in the same block. Barbara said that Daniel mother is a "dope fiend" and a real weirdo." She further stated that the mother does not want Daniel and never did. Daniel lived in seven or eight foster homes and when Barbara and her family moved to Idaho in 1978 he accompanied them. He has lived with them since that tim Daniel can't hold a job as he is unable to take orders and is rather lazy. She said that he a good kid when sober, but has a severe drinking problem. She was unaware of any other drug abuse. Daniel went into the Army for two and a half months (January - March 1980) and did get an honorable, medical discharge (as he has asthma attacks and was too sickly for the military duty). Barbara does have his discharge papers. Barbara said that Daniel has no ski of any kind and has a difficult time caring for himself. She said that he really needs a family setting. Daniel has hang-ups about living with his mother and feels that he needs her love. He has returned to home on several occasions only to be hurt, rejected and returne to Barbara's home. Daniel met Mr. Ward in Salmon, Idaho and Mr. Ward told Barbara he was in the process of buying two small ranches and needed the boys to work the ranches. She further stated that Daniel did not graduate from high school as he missed the last three months. She was unaware of any suicide attempts or gestures, but stated he writes about death. When he becomes intoxicated he lets all of his hurt, anger and hate out.

When Daniel was confronted with this information and was asked why he was not truthful he replied, "My whole life has been so terrible and I didn't want you to think poorly of me. I thought if you knew the whole truth, I wouldn't be liked and maybe wouldn't be allowed in the hospital."

Wyoming State Hospital
SOCIAL HISTORY

DEPARTMENT OF ALCOHOL AND DRUG ABUSE TREATMENT SERVICES INTAKE HISTORY

IDENTIFYING INFORMATION:
Dan is a nineteen year old, single, unemployed, nonresident, Caucasian male truck driver who entered the hospital by Voluntary Application from Rock Springs, Sweetwater County, Wyoming on December 1, 1980. He arrived in Evanston by bus and was unaccompanied. Prior to his admission he was hospitalized in the Sweetwater County Memorial Hospital from November 28th to his admission on December 1st, as he made a suicide attempt by taking an unknown amount of unknown medications. While hospitalized he was contacted by Joe Dills, M.S.W., of the Sweetwater County Mental Health Center.

INFORMANTS:
The patient was interviewed for the social history on the Admission Unit on December 3, 1980. His grooming was appropriate, but his clothing could best be described as "rags." He offered information readily, was cooperative and his recall was satisfactory. Additional information was gathered by interview with Joe Dills, M.S.W., and will be sought from the patient's mother. Information will also be sought from Dennis and Nancy Ward of Rock Springs, Wyoming. Daniel has been living with the Ward family from August 1980 to the time of his hospitalization.

PRESENTING PROBLEMS:
During the interview with the patient the following information was obtained. Dan stated that he has entered the hospital as he is a problem drinker and nine out of every ten times he gets drunk, it results in a hospitalization for one reason or another. On November 24th Dan made a suicide attempt by taking a handfull of medication from the medicine cabinet and drinking a large amount of alcohol. He awoke in the hospital and does not know who found him or the circumstances leading to his hospitalization. Dan said that he spent Thanksgiving alone, had been reading old letters from his mother that were very depressing and had just lost his job. He was very depressed and decided life wasn't worth the struggle.

Daniel denies using street drugs or abusing prescription medication. He stated that he has taken Valium when he is very nervous or upset. From March 1980 to the present time his drinking habits have been about the same. He has drank to intoxication every chance he gets and estimates he will get semi-intoxicated three times weekly, consuming about three six-packs of beer and a half pint of whiskey. Prior to entering the military in January 1979, he did not use alcoholic beverages. Daniel said that from January 1979 to March 1980, he has had many problems because of his drinking. He has been involved in fights, dropped a grade in the military and was unable to get along with his peers. He drank alcohol almost daily, consuming four to five cans of beer and sometimes he drank to intoxication twice weekly consuming two or three six-packs of beer. From July 1979 to the present time he has experienced three blackouts, minor morning shakes and on rare occasion uses the a.m. drink. He has experienced one visual hallucination as he has seen little green things sitting on light posts.

PAST MEDICAL AND PSYCHIATRIC HISTORY:
This is the patient's first psychiatric hospitalization. He estimates that he has been hospitalized on eight or ten occasions for alcohol related reasons as he is hurt in a fight or an accident. He does become very ill and on occasion is unable to care for himself. His last hospitalization was just prior to admission. Dan said that in 1976 he injured his left thumb and does have a steel pin supporting the thumb. He began having asthma attacks at age nine, contracted pneumonia at age eight and had a tonsillectomy at age seven. He was unable to recall any other hospitalizations nor could he recall any food or drug allergies. Daniel stated that this was his first suicide attempt although he has had many suicide thoughts. Prior to his admission, he was taking Marax for asthma and was taking it as needed. For three months in 1978, he was taking Mellaril one tablet every four hours (as prescribed) and discontinued the medication when his physician discontinued treatment.
