**gender prediction test**

**\*use as early as 10 weeks**

IntelliGender's Gender Prediction Test™... a fun pre-birth experience for moms who can't wait to know! You may use our gender prediction test weeks before your sonogram.

**a simple baby gender prediction test you can take at home**

IntelliGender's **Gender Prediction Test** is an affordable, simple-to-use urine test that provides immediate gender results in the privacy and comfort of the home. In minutes, the IntelliGender Gender Prediction Test indicates your gender result based upon an easy to read color match. Green indicates boy and orange indicates girl!

**when can I use it?**

As early as 10 weeks into your pregnancy (8 weeks post-conception). Most women find out the sex of their baby at their 20-week sonogram as long as Baby chooses to cooperate. IntelliGender bridges the curiosity gap between conception and sonogram.

\*Note: IntelliGender may not predict your baby's gender with 100% accuracy. Please [click here](#) for our FAQ on accuracy:
