The login process for attorneys and experts changes with the v6.4 release. The first time you access eVoucher, you will be prompted to set up a new single login profile.

1. Provide the email address you want to use to log in. You must have access to this email to verify it.

2. Type the Username and Password for your eVoucher account. This only needs to be done once.

The system will guide you through...
- completing your new login profile,
- selecting and answering three security questions,
- verifying your email address, and
- setting your password.

Upon completion of this process, you will use your email address and password for all future logins to eVoucher.
